

# Logic Building Assignment

Consider Singly Linear LinkedList to solve below problem statements

## 1. Display Only Odd Elements

Print only odd elements.

```
void DisplayOdd(PNODE Head);
```

## 2. First Occurrence Position

Return position of first occurrence.

```
int FirstOccur(PNODE Head, int No);
```

## 3. Last Occurrence Position

Return position of last occurrence.

```
int LastOccur(PNODE Head, int No);
```

## 4. Count Numbers Greater Than X

Count elements greater than given number.

```
int CountGreater(PNODE Head, int X);
```

## 5. Count Numbers Less Than X

Count elements less than given number.

```
int CountLess(PNODE Head, int X);
```
