

Logic Building Assignment : 53

1. Write generic program to copy one array into another

```
template <class T>
void CopyArray(T *src, T *dest, int iSize)
{
    // Logic
}
```

2. Write generic program to check whether array is sorted

```
template <class T>
bool CheckSorted(T *arr, int iSize)
{
    // Logic
}
```

3. Write generic program to find second largest element

```
template <class T>
T SecondMax(T *arr, int iSize)
{
    // Logic
}
```

4. Write generic program to find second smallest element

```
template <class T>
T SecondMin(T *arr, int iSize)
{
    // Logic
}
```

5. Write generic program to replace all occurrences of a value

```
template <class T>
void Replace(T *arr, int iSize, T oldVal, T newVal)
{
    // Logic
}
```
