

Logic Building Assignment : 54

1. Write generic program to search a value in an array

```
template <class T>
bool Search(T *arr, int iSize, T value)
{
    // Logic
}
```

2. Write generic program to find sum of all even elements

```
template <class T>
T SumEven(T *arr, int iSize)
{
    // Logic
}
```

3. Write generic program to find sum of all odd elements

```
template <class T>
T SumOdd(T *arr, int iSize)
{
    // Logic
}
```

4. Write generic program to reverse an array

```
template <class T>
void Reverse(T *arr, int iSize)
{
    // Logic
}
```

5. Write generic program to find smallest element from an array

```
template <class T>
T Min(T *arr, int iSize)
{
    // Logic
}
```
