

Logic Building Assignment

Consider Singly Linear LinkedList to solve below problem statements

1. Search an Element

Check whether a number is present.

```
bool Search(PNODE Head, int No);
```

2. Count Even Numbers

Count nodes containing even values.

```
int CountEven(PNODE Head);
```

3. Count Odd Numbers

Count nodes containing odd values.

```
int CountOdd(PNODE Head);
```

4. Count Frequency of Given Number

Count how many times a number appears.

```
int Frequency(PNODE Head, int No);
```

5. Display Only Even Elements

Print only even elements.

```
void DisplayEven(PNODE Head);
```
