

Logic Building Assignment

Consider Singly Linear LinkedList to solve below problem statements

1. Display Elements Greater Than X

Print elements greater than X.

```
void DisplayGreater(PNODE Head, int X);
```

2. Display Elements Less Than X

Print elements less than X.

```
void DisplayLess(PNODE Head, int X);
```

3. Check Whether List is Empty

Return true if list is empty.

```
bool IsEmpty(PNODE Head);
```

4. Replace Negative Numbers with Zero

Modify list: negative values become 0.

```
void ReplaceNegative(PPNODE Head);
```

5. Increment Each Node Value by 1

Increase each element by 1.

```
void IncrementAll(PPNODE Head);
```
