

Logic Building Assignment : 17

1. Write a program to find the sum of digits of a number.

```
class Logic
{
    void sumOfDigits(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.sumOfDigits(1234);
    }
}
```

2. Write a program to check whether a number is a palindrome or not.

```
class Logic
{
    void checkPalindrome(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.checkPalindrome(121);
    }
}
```

3. Write a program to find the maximum of two numbers.

```
class Logic
```

```
{
    void findMax(int a, int b)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.findMax(20, 15);
    }
}
```

4. Write a program to find the minimum of three numbers.

```
class Logic
{
    void findMin(int a, int b, int c)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.findMin(3, 7, 2);
    }
}
```

5. Write a program to print the multiplication table of a number.

```
class Logic
{
    void printTable(int num)
    {
        // Write logic here
    }
}
```

```
class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.printTable(5);
    }
}
```
