

Logic Building Assignment : 19

1. Write a program to check whether a given year is a leap year or not.

```
class Logic
{
    void checkLeapYear(int year)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.checkLeapYear(2024);
    }
}
```

2. Write a program to display the grade of a student based on marks.

```
class Logic
{
    void displayGrade(int marks)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.displayGrade(82);
    }
}
```

3. Write a program to check whether a number is divisible by 5 and 11 or not.

```
class Logic
{
    void checkDivisible(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.checkDivisible(55);
    }
}
```

4. Write a program to print each digit of a number separately.

```
class Logic
{
    void printDigits(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.printDigits(9876);
    }
}
```

5. Write a program to calculate the power of a number using loops.

```
class Logic
{
    void calculatePower(int base, int exp)
    {
        // Write logic here
    }
}
```

```
class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.calculatePower(2, 5);
    }
}
```
