

Logic Building Assignment : 20

1. Write a program to find the sum of all even numbers up to N.

```
class Logic
{
    void sumEvenNumbers(int n)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.sumEvenNumbers(10);
    }
}
```

2. Write a program to print numbers from N down to 1 in reverse order.

```
class Logic
{
    void printReverse(int n)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.printReverse(10);
    }
}
```

3. Write a program to check whether a number is a perfect number or not.

```
class Logic
```

```
{
    void checkPerfect(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.checkPerfect(6);
    }
}
```

4. Write a program to find the largest digit in a given number.

```
class Logic
{
    void findLargestDigit(int num)
    {
        // Write logic here
    }
}

class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.findLargestDigit(83429);
    }
}
```

5. Write a program to find the smallest digit in a given number.

```
class Logic
{
    void findSmallestDigit(int num)
    {
        // Write logic here
    }
}
```

```
class Program
{
    public static void main(String args[])
    {
        Logic obj = new Logic();
        obj.findSmallestDigit(45872);
    }
}
```
